LOCATION

In the last 20 years an industrial area, still enlarging, has been settled. The climate is generally quiet and poor of rain, although the temperature changes are fast and short, due to the wind from the Balkan area. In spite of the fact that our area has good road, railways, air and maritime facilities, and that it has strategic links with the East-Mediterranean and Balkan countries, it is quite distant from the so-called heart of Europe. Molfetta is known in the last years for an important growth in terms of commercial activities and attractions, thanks to the recent creation of a huge commercial area (outlet and shopping mall), provided of shops, national chains, outlet, luna park, hard discount, cinemas and so on. At the same time in the old city town many restaurants, bars, and youth centers are very crowded during the weekend and in the evening.

THE WEATHER

Molfetta's climate is generally mild and sunny, thanks to its geographical location. But beware! Temperatures can vary rapidly due to the Balkan wind.

MISSION 4: XFARM - AGRICOLTURA PROSSIMA

XFARM Agricoltura prossima is a project by Cooperativa Sociale Qualcosa di Diverso, born after the experience of Laboratorio Urbano ExFadda in San Vito dei Normanni: a social, ecological and multicultural farm created from the recovery of lands confiscated from the mafia in Apulia.

We are a group of young people under 35 committed to transforming 50 hectares of lands, once a symbol of illegality and unsustainable agriculture, into a “Manifesto Farm” of good social, ecological, and cultural practices. We’ve been creating an original rural hub capable of contributing to the local development of the Alto Salento area, through the creation of jobs, wellbeing for the community and ecosystem improvement. We believe in the territory of Puglia and in its resources, too often unexpressed and squandered.

We look at XFARM and its lands as a common good, a big public park opened to the community of the territory. We want to put into action a new vision of social and regenerative agriculture, alternative to the intensive and unsustainable models. We promote the regeneration of soil and the recovery of biodiversity, we foster circular economy practices, job integration of fragile workers and the production of good quality and healthy food, we organize social and cultural events for the local community, we support the scientific research and agricultural projects of young people of our territory.

Tasks of the volunteer :

To provide support to the agricultural activities within the farm, notably: management of the vegetable crops and community garden, the olive groves, the vineyard and the henhouse.

Additional activities will be:

1 - Support to the activities of planting, management and experimentation related to the project “XFARM Agroforestry” aimed at increasing biodiversity and regenerating the soil.

- 2 - Support to the designing and organization of Manifesto SuperCamp, a week-long festival focused on agro-ecology related training and workshops, seminars, research, events and camping in the nature.
- 3 - Support to the organization of public events, seminars, workshops, training lessons open to the local community and the company’s partners.
- 4 - Support to the organization of social activities aimed at raising awareness on agro-ecological issues, those referred to the social fight against the mafia and local development.

San Vito dei Normanni, in the heart of Puglia :

The project will take place in San Vito dei Normanni, a city of around 20.000 inhabitants in the heart of Apulia. It’s located at about 20 km from Brindisi, 14 km from Ostuni, about 12 km (16 minutes) from the wonderful marine natural reserve of Torre Guaceto, and 40 km from Lecce. From Brindisi it’s easy to reach the major touristic areas and urban centres in the region by public transportation. (train, bus, plane). During summer the city is bustling with people enjoying cultural events and other social activities organized by the local community.
